

MULTISITE SOLUTIONS

BUILT FOR MULTISITE CHURCHES?

We developed our RMSS solution by simply listening to our clients. When doing research we discovered bandwidth, for whatever reason, is the most common issue plaguing multisite churches. To get around this issue, we came up with the idea to download segments first, then playing the segments back locally. Our methodology allows multisite churches to enjoy smooth playback.

CHOOSE A SOLUTION?

01. **Software Solution:** Is the ability to use our software on your Mac computer. You will save on the expense of buying dedicated hardware and also have the ability to repurpose your Mac.

02. **Appliance Solution:** Maximize your redundancy for 100% uptime and have greater control of each campus with our very own cloud sync technology. We support single or dual feeds.

HOW YOU BENEFIT

Smooth Streaming

Our unique method of downloading the segments first, then playing back the files locally eliminates the dependability of strong bandwidth.

Creative Solution

Our in-house engineers are always trying to think of new and innovating ways to enhance your multisite streaming experience.

Detailed Reporting

The only solution that allows you to check the pulse of every campus, both in real time and by historical analysis.

Great Support

Things happen! We will be there for you 24/7 when it does, even on the weekends! Have confidence when you call, we will solve the issue.
